Monil Mehta

Education

SVKM's Dwarkadas J Sanghvi College Of Engineering

CGPA - 9.58/10

2022 - 2026

Bachelor of Technology (B. Tech) in Computer Engineering

Mumbai, India

Professional Experience

Founding Engineer - ZenfruAI

May 2025 – Current

- Engineered and deployed an AI voice agent backend using **Agentic AI**, **ElevenLabs**, and REST APIs, which led to **0**% **missed calls** and **80**% **appointment conversion** for clinics outside operating hours.
- Created two websites using Next.js: a landing page for lead generation and a product demo for showcasing the solution.
- Collaborated directly with **US-based dental clinics**, successfully shipping an MVP that secured **1 pilot**.

Software Developer Intern – Miscot System Pvt Ltd

Jan 2025 - Mar 2025

- Developed Python-based Aadhaar Photos storage optimization algorithms, later converted to C#, reducing file size by 70% (JPEG to TIFF: 7MB \rightarrow 2MB, JPEG to PDF: 2.5MB) for improved cloud storage efficiency.
- Upgraded an outdated Angular codebase to v19 and added new modules for form-based data intake into the database

QA and Test Automation Intern – Intermind Digital LLP

Jun 2024 - Sep 2024

- Automated 25+ automation scripts in Python using Selenium WebDrivers, reducing regression testing time by 20%.
- Executed manual test cases for testing MySENCO Gold and Tata ELXSI applications, improving usability scores by reporting and fixing issues, reducing development time by 15%.
- Designed an internal tool featuring an interactive dashboard for organizing, creating, and tracking various test cases.

Projects

Songfer | Next.js, Django REST, Redis, Celery

[Live] [Github]

Apr 2025 - May 2025

- Developed **Songfer**, a music and playlist downloader supporting high-quality downloads with cover art and metadata.
- Implemented Redis caching and async download queues, reducing backend load by 30% and speeding downloads.
- Devised a KMeans-based recommendation engine using user listening patterns, improving engagement 25%.

Lingual | Expo, Flask, MongoDB, YOLO-World, Whisper v3

[Live] [Github]

Feb 2025 – Apr

- Built a cross-platform mobile app supporting 10+ localized languages, enabling real-time translation, object detection and educational tools for Android.
- Seamlessly connected YOLO-World for object detection and Whisper v3 for audio transcription, cutting media processing lag by 50% with async task queues.

SocialFlow | Next.js, Node.js, MongoDB, WebSockets, AWS S3 [Live] [Github]

Feb 2025 - Apr 2025

- Crafted a full-stack social media platform with user CRUD, individual and group chat, and interactive posts.
- Designed a mobile-responsive frontend in Next.js with optimized state management and Axios interceptors, **reducing client-server latency by 35%** and enhancing session reliability.
- \bullet Boosted user engagement by 30% through S3 media uploads, hashtag search and a **graph-based recommendation** system for personalized content discovery.

More Projects | MoneyOverflow, Invoice Management, QuillSpace, NurtureNest, ComicConnect

Leadership and Activities

DJ Unicode Oct 2023–Present

Full Stack Django Mentor

College

- Mentoring a group of 4 juniors in full-stack development with a focus on **Django**, **DRF**, **API design**, **ReactJS**
- Conducted a hands-on Git and GitHub workshop for **50+ students**, covering version control fundamentals and collaborative workflows; currently leading a team of **10 juniors** in building a **book marketplace platform** .

Hackathons and Open Source

- Completed Hacktoberfest 2024 with 9 quality pull requests across diverse open-source repositories.
- Participated in 10+ hackathons, securing 1 runner-up finish and becoming a finalist in 2 events.

JPMC College to Corporate Program

Mar 2024-Present

• Selected for a prestigious external engagement program with JPMorgan Chase & Co., covering frontend development, agile methodologies, cloud computing, DevOps and software practices.

Technical Skills

Languages: C++, Python, JavaScript, C, SQL, TypeScript, Java

Frameworks & Libraries: Next.js, React.js, Node.js, Express.js, Django, NumPy, Pandas, Scikit-Learn, OpenCV.

Databases: MongoDB, PostgreSQL, MySQL, Supabase

Tools & Technologies: Git, GitHub, VS Code, Docker, AWS (EC2, S3), Vercel, Postman, Selenium
